AHIMA®

A young woman with dark hair is smiling and looking down at an elderly woman with white hair. The young woman is holding a stethoscope around the elderly woman's neck. They are both smiling warmly at each other. The background is a soft, out-of-focus blue.

EMPOWERING PEOPLE TO IMPACT HEALTH[®]

We're dedicated to creating a brighter future and driving progress in healthcare.

Together, we have the power to enhance the lives of those supported by healthcare organizations across the nation. By providing innovative teaching solutions and valuable resources to future learners, we can have an even greater impact.

Together, we can positively change healthcare.

A *New Chapter* in Health Information Education

Empowering people to impact health® starts with education.

Education is where change begins, and we're here to support you in building a strong foundation for the future of health information. At AHIMA, we're focused on helping you grow tomorrow's healthcare leaders while working side by side with experts like you.

Here's how we can support your goals:

1

Helping Your Students Succeed

We provide resources like AHIMA Press® and AHIMA VLab® to give your students the tools they need to grow their skills and meet their learning goals, all while supporting the vision of your academic program.

2

Developing You as a Leader

Your role as an educator is key in shaping healthcare's future. Through the AHIMA Assembly on Education, we offer opportunities to expand your knowledge and stay connected with the latest in both practice and education.

3

Preparing Students for Their Careers

We're dedicated to helping your students succeed beyond graduation. From certification to networking with industry professionals, AHIMA gives them the connections and credentials to navigate their careers in the ever-changing healthcare field.

Find the tools to make an impact and elevate your program.

www.ahima.org/higher-education

Supporting Your *Success*

We understand your passion for helping students achieve their goals.

Our learning bundles combine gold-standard AHIMA resources and technology to create a well-rounded approach to learning. By uniting essential content and practical tools, these bundles strengthen core skills, deepen real-world knowledge, and give your students a head start toward certification and career success.

Access AHIMA Press Book Resources with *Ease*

AHIMA Press downloadable book resources are available anytime in the AHIMA Learning Center. Here, you can access your AHIMA benefits, explore book resources, sign up for webinars and courses, and use AHIMA VLab®—all in one convenient place!

What Do You Need to Do?

Everyone with an AHIMA Press book should re-register their books in the AHIMA Learning Center, if you have done so already. Follow these steps for a smooth transition, and if you need help, our FAQs have you covered. For additional questions, feel free to reach out to online.education@ahima.org.

Quick Steps to Register Your Book

1. Find Your Access Code: If you're unsure where to locate it, check our FAQs.
2. Visit the AHIMA Learning Center: Open my.ahima.org/learningcenter in your browser.
3. Log In or Create a myAHIMA Account
4. Add Your Code: Select "Add Code" and enter your book's access code. You'll now see the book listed under "Current Classes."
5. Access Book Resources: Click the book title to open the course page in a new tab. Select "Get Started" or "Launch Unit" to view or download the resources, which you can access as needed throughout the book's edition lifespan (one year after the next edition is published).

What's New?

We know how important exam preparation is for you and your students. You can now explore updated practice exams and question modules designed to support each exam preparation book and maximize your study sessions.

Discover opportunities to add value to your program. Visit ahima.org/higher-education for more information.

The Heart of *Healthcare:* Telling Our Patients' Story

In health information, coding, classification, and reimbursement play a key role in giving patients a positive healthcare experience.

AHIMA® textbooks are designed to be trusted guides for your students, filled with up-to-date content, best practices, and essential insights.

Our textbooks evolve with the healthcare landscape, continually updated to reflect new coding standards and guidelines. This commitment ensures your students build the relevant, real-world skills that matter most.

Coding, Classification, and Reimbursement

Table of Contents

Introduction
How to Use this Manual
ICD-10-CM Official Guidelines and Reporting
Index to Diseases and Injuries
Table of Neoplasms
Table of Drugs and Chemicals
Index to External Causes
Tabular List of Diseases and Injuries
1 Certain Infectious and Parasitic Diseases (A00–B99)
2 Neoplasms (C00–D49)
3 Diseases of the Blood and Blood-forming Organs and Certain Disorders Involving the Immune Mechanism (D50–D89)
4 Endocrine, Nutritional, and Metabolic Diseases (E00–E89)
5 Mental, Behavioral, and Neurodevelopmental Disorders (F01–F99)
6 Diseases of the Nervous System (G00–G99)
7 Diseases of the Eye and Adnexa (H00–H59)
8 Diseases of the Ear and Mastoid Process (H60–H95)
9 Diseases of the Circulatory System (I00–I99)
10 Diseases of the Respiratory System (J00–J99)
11 Diseases of the Digestive System (K00–K95)
12 Diseases of the Skin and Subcutaneous Tissue (L00–L99)
13 Diseases of the Musculoskeletal System and Connective Tissue (M00–M99)
14 Diseases of the Genitourinary System (N00–N99)
15 Pregnancy and the Puerperium (O00–O9A)
16 Certain Conditions Originating in the Perinatal Period (P00–P96)
17 Congenital Malformations, Deformations and Chromosomal Abnormalities (Q00–Q99)
18 Symptoms, Signs and Abnormal Clinical and Laboratory Findings, Not Elsewhere Classified (R00–R99)
19 Injury, Poisoning and Certain Other Consequences of External Causes (S00–T88)
20 External Causes of Morbidity (V00–Y99)
21 Factors Influencing Health Status and Contact with Health Services (Z00–Z99)

22 Codes for Special Purposes (U00–U85)

Appendix A: Anatomical illustrations and 4-color art

Online Appendices

Appendix B: CC/MCC Principal Diagnosis Collections and Exclusion Lists

Appendix C: Hospital-Acquired Conditions (HAC) List

Appendix D: Deleted ICD-10-CM Codes FY 2026

Appendix E: Abbreviations

About the Book

AHIMA proudly presents the *ICD-10-CM Code Book, 2026*, to help you execute *the International Classification of Diseases, Tenth Revision, Clinical Modification*. The combination of both the Decision Health and AHIMA Press manuals retains key features and adds new presentations resulting in an enhanced and improved manual for educators and professionals.

Key Features

- Completely updated with 2026 codes and coding guidelines
- Illustrations included throughout the Tabular with additional in an Appendix.
- Available in spiral- or perfect-bound formats
- Features color-coded tabs to align with section colors
- Color-coded sections ease navigation and code selection
- Includes Hierarchical Condition Category (HCC) codes
- Definitions included throughout Tabular to help understand the scope of a diagnosis
- Coding Tips included throughout Tabular offer guidance and raise red flags to encourage compliance and accurate reimbursement
- MCC and CC codes as identified by the MS-DRG system
- Coding guidelines included in the Introduction and before each section for quick reference
- ICD-10 guidelines excerpts embedded in the tabular at the code level
- American Hospital Association (AHA) Coding Clinic references included throughout the Tabular
- Icons to indicate New, Revised, and Deleted Codes
- Identification of diagnoses that impact Medicare Code Editor (MCE) edits
- Identification of diagnoses included in Medicare's Hospital-Acquired Conditions (HAC) Program
- Appendices include Anatomical art and 4-color illustrations (in-text), Abbreviations, Principal Diagnosis Collections and Exclusions for CC and MCC, and HAC Listings (online)

About the Book

AHIMA proudly presents the *ICD-10-PCS Code Book, Professional Edition, 2026*, to help medical coders execute the *International Classification of Diseases, Tenth Revision, Procedure Coding System* specifically in the inpatient setting.

Key Features

- Completely updated with 2026 codes and coding guidelines
- Anatomical illustrations included
- Spiral-bound
- Contains only the Index, Tables, and Appendices, creating an accessible and efficient flow for professional coders
- Features color-coded tabs to align with section colors
- Color-coded sections ease navigation and code selection
- Coding guidelines included in the Introduction and before each section for quick reference
- American Hospital Association (AHA) Coding Clinic references provided for all sections
- Anatomical art included in each body system section of the Medical and Surgical Tables
- Appendices include Root Operation Definitions, Type and Qualifier Definitions, Approach Definitions, Medical and Surgical Body Parts, Medical and Surgical Device Table and Device Aggregation Table, Substance Qualifier Table, and New Codes

About the Book

The 2026 *HCPCS Level II Expert* has everything you need to know about each HCPCS code including new guidance, changes to APC and ASC payment icons and updates to Pub 100 information and modifiers. Not to mention helpful advice, and code-specific details, such as icons and helpful reimbursement indicators, all at your fingertips for easy access within seconds.

Key Features

- New, revised and deleted HCPCS Level II Codes with icons to identify changes.
- Expanded alphabetical index organized with guidance and input from experienced coding and billing professionals.
- Deleted codes crosswalks display valid codes that have replaced temporary codes and other deletions.
- National Coverage Determination (NCD) policy code-level citations ensure compliance with Medicare coverage policy for certain procedures and professional services.
- Medicare Pub 100 information with associated code and an Appendix of full descriptions.
- Table of Drugs Appendix with J codes cross-referenced to brand names.
- APC and ASC payment icons show those codes payable under Outpatient Prospective Payment Systems (OPPS) and those that can use 18 ASC groupings.
- AHA Coding Clinic for HCPCS identify where to find critical guidance on challenging HCPCS Level II codes or sections.
- Age and sex edit icons indicate code restrictions at a glance, based on patient information.
- Icons for specific payment rules indicate coverage rules and patient responsibility for drugs and services not reimbursed by Medicare.
- High-quality illustrations provide visual insight into specific equipment, supplies and services.

Instructor Resources include the following:

- Instructor manual
- Test bank
- Full answer keys
- Presentation slides

The test bank is also available in Respondus.

About the Book

Basic ICD-10-CM and ICD-10-PCS Coding, 2026, introduces students and professionals to a balanced approach to coding. By supplying basic coding principles and conventions using actual case documentation, this book provides the foundation to build and apply coding knowledge in a real-world setting.

Key Features

- Fully updated to the 2026 ICD-10-CM and ICD-10-PCS codes sets and guidelines
- Key concepts and topics in each chapter are called out in the margins
- Chapters are organized by body systems with a step-by-step approach to rules, rationales for use, and relevant parts of the ICD-10-CM coding guidelines
- Chapters include coding guidelines and instructional notes relevant to body system diagnoses and conditions, and include explanations of clinical conditions with patient care scenarios
- Each chapter covers ICD-10-CM and ICD-10-PCS classification systems and offers Check Your Understanding questions and review exercises to apply coding knowledge and skills
- Online coding scenarios help students gain practice using real-world examples
- Answers to odd-numbered exercises are available online

About the Authors

Brooke N. Palkie, EdD, CPHIMS, RHIA, FAHIMA, is the Chair of the Health Science and Technology Department at Charter Oak State College and the Program Director of the M.S. Health Informatics and M.S. Health Care Administration Programs. She is an ICD-10-CM and ICD-10-PCS AHIMA-approved trainer and has been involved with several ICD-10 educational training programs and grant-funded projects.

Stacey Walraven, RHIA, CDIP, CCS, CPC, COC, CHTS-TR, is an associate in the Health Science and Technology department at Charter Oak State College. She has spent nearly two decades in the health information field with a heavy focus on medical coding. Ms. Walraven is an AHIMA-approved ICD-10-CM and ICD-10-PCS trainer. She also serves as a higher education peer reviewer for Quality Matters.

About the Book

Basic ICD-10-CM and ICD-10-PCS Coding Exercises provides the practice beginner coders need to develop the ICD-10-CM and ICD-10-PCS coding skills to be successful, and can be used as a companion text to *Basic ICD-10-CM and ICD-10-PCS Coding*, 2026, or as a stand-alone workbook practice for those new to coding. The exercises are short case studies and operative descriptions of real, deidentified, patient encounters in healthcare.

This book offers over 400 ICD-10-CM and ICD-10-PCS patient care encounter scenarios to guide and prepare students and professionals to make realistic diagnostic and procedural coding decisions.

Key Features

- Fully updated to the 2026 ICD-10-CM and ICD-10-PCS codes sets and guidelines
- Advanced case studies with elevated details for users to practice coding
- Chapter organization aligns with the 21-chapter ICD-10-CM Tabular List
- Offers coding practice for increased proficiency
- Answers to odd-numbered exercises provided at the end of the text

Available as a Bundle

BUNDLE THIS BOOK WITH THE AMERICAN MEDICAL ASSOCIATION'S CPT® 2026 PROFESSIONAL EDITION.

Ask your Sales Representative for more information, or see the [AHIMA Store](https://www.ahima.org/store).

Instructor Resources include the following:

- Instructor manual
- Test bank
- Full answer key
- Presentation slides
- Transition guide

The test bank is also available in Respondus.

About the Book

Coding students will excel with the 2026 edition of *Current Procedural Terminology and HCPCS Coding for Physicians and Facilities*. Gain basic training and practice in the application of procedural codes from Current Procedural Terminology (CPT®) and the Healthcare Common Procedure Coding System (HCPCS). CPT® codes effective January 1, 2026, are explained throughout the text.

Key Features

- Fully updated for the 2026 codes and coding guidelines
- Challenge exercises simulate the nuanced coding scenarios coding professionals or physicians are likely to encounter in the real world
- Updated artwork helps students visualize anatomy and related surgical procedures as they practice coding
- Complete explanation of symbols and formatting used in CPT® and HCPCS coding provides a foundation for learning and application

About the Author

Kimberly Huey, MJ, CCS-P, CHC, COC, CPC, CPO, PCS, is an independent coding, reimbursement and compliance consultant with forty years of experience in professional and outpatient facility coding.

About the Book

Current Procedural Terminology and HCPCS Coding for Physicians and Facilities Exercises, 2026, encourages skill building through real-world case studies and application exercises. The practice exercises emphasize knowledge of medical terminology, anatomy, and clinical coding.

Key Features

- Exercises reflect the chapter content in *Current Procedural Terminology and HCPCS Coding for Physicians and Facilities*
- Advanced exercises to practice visual coding of cases from simple procedures to complex surgeries
- Detailed case studies taken from health records offer real-world coding scenarios
- Exercises covering ancillary services such as laboratory and radiology
- Illustrations augment discussion of the body systems
- Examples of connecting CPT® codes to ICD-10-CM codes to support medical necessity
- Exercises provide targeted experience with specific categories of codes and mixed codes that occur in the real world
- Features the latest Evaluation and Management Services information

About the Editors

Kimberly Huey, MJ, CCS-P, CHC, COC, CPC, CPCO, PCS, is an independent coding, reimbursement and compliance consultant with forty years of experience in professional and outpatient facility coding.

Gretchen Jopp, MS, RHIA, CCS, CPC is the Director of Healthcare Business Programs at Clarkson College in Omaha, NE. The focus of her career has been on education, physician and facility coding and billing, and data analysis.

- Presentation slides
- Complete answer key with rationales

About the Book

Clinical Coding Workout, 2026, challenges coding students and professionals to develop the expert skills required for coding accuracy. More than 1,500 practice coding scenarios and exercises are offered to help users develop the skills needed to enhance their performance. Chapters are divided by code set or care setting with subsections that address specific body systems and diseases to provide targeted practice. Updated online answer key reflects 2026 codes and guidelines.

Designed for a variety of skill levels, this valuable resource can be used many ways:

- HIM educators can use the exercises to supplement basic- and intermediate-level course materials.
- Coding professionals can use the exercises to gain additional coding experience in inpatient, ambulatory, physician practice, and nonacute-care settings.
- Individuals preparing to sit for the CCS® and CCS-P® certification exams offered by AHIMA can gain additional practice in a variety of specialty coding topics.

Key Features

- All exercises updated for 2026 ICD-10-CM, ICD-10-PCS, CPT®, and HCPCS Level II code sets and guidelines
- Coding for present on admission (POA), E/M, and MS-DRGs (v43 grouper) included
- An answer key for odd-numbered questions with rationales provided in downloadable resources

About the Book

This comprehensive text is devoted to learning and mastering the process of building codes in ICD-10-PCS. All current coding professionals and students in academic programs must become and remain proficient in using this system for inpatient procedures.

ICD-10-PCS: An Applied Approach enhances learning through in-depth discussion of the code building process. Code Building Exercises guide the reader through the process of evaluating an operative report by providing thought-provoking questions along with complete in-text answers and rationales. In addition, *ICD-10-PCS: An Applied Approach* is enriched with annotated reports, decision trees, short-statement coding, and capstone exercises to reinforce chapter concepts.

Key Features

- Updated with 2026 revisions to ICD-10-PCS code set and guidelines
- New annotated operative reports support knowledge of approaches and surgical tools
- Comprehensive companion exercise workbook available online
- Select answers with rationales included in appendix B

About the Authors

Lynn Kuehn, MS, RHIA, CCS-P, FAHIMA, is president of Kuehn Consulting in Waukesha, WI.

Therese K. Jorwic, MPH, RHIA, CCS, CCS-P, FAHIMA, is president of TKJ Consulting.

About the Book

Medical Coding in the Real World, Fourth Edition, presents the intricacies of medical coding in ICD-10-CM, ICD-10-PCS, CPT®, and HCPCS code sets across a variety of specialty areas. This text offers accessible instruction on how to correctly identify, select, and apply codes to the health record in a real-world setting, with each chapter focusing on a specialty and building in complexity from topic to topic. It provides a natural progression that allows students to learn the coding process intuitively and organically. Chapters contain coding exercises ranging in difficulty from simple to complex, case studies to code, and required billing forms to complete.

Key Features

- New! Fix That Claim exercises require students to determine both the reason for a coding denial and how to fix the claim
- Updated Key to Success boxes, There's a Code for That exercises, and Putting It All Together sections further student comprehension
- End-of-chapter case studies guide readers through each step of the coding process, from abstracting the health record to searching the code book and, ultimately, selecting the correct code
- Full-color imagery including surgical illustrations, code book snippets, and learning aids help students visualize complex coding concepts
- Hierarchical Condition Category (HCC) coding references incorporated throughout the textbook

About the Book

Medical Coding in the Real World Student Workbook, Fourth Edition, is a comprehensive student workbook designed to be used in conjunction with *Medical Coding in the Real World*. The workbook enhances understanding of the information and concepts addressed in each chapter of the textbook. Workbook chapters include detailed, specialty-specific coding case studies in addition to multiple choice, matching, and short answer exercises. Additional practice exercises focus on selecting, sequencing, and reporting appropriate ICD-10-CM, ICD-10-PCS, CPT®, and HCPCS codes.

Key Features

- Updated case studies guide students through each step of the health record abstraction and code selection process
- Provides a comprehensive range of exercises to apply ICD-10-CM, ICD-10-PCS, CPT®, and HCPCS code sets across a variety of specialty areas in a real-world setting
- Pairs seamlessly with the *Medical Coding in the Real World* textbook
- Includes answers to odd-numbered questions in the appendices for self-evaluation
- Supplies blank claim forms to support related coding exercises

- Presentation slides
- Transition guide

The test bank is also available in Respondus.

About the Book

Healthcare Code Sets, Clinical Terminologies, and Classification Systems, Fifth Edition, features up-to-date content to familiarize readers with healthcare's vast and complex structure of terminologies. With topics that include ICD-10-CM, ICD-10-PCS, CPT®, HCPCS, CDT, SNOMED CT, LOINC, RxNorm, DSM-5, and ICD-11, this new edition also accounts for the use and advancement of artificial intelligence (AI) and clinical documentation technology. This resource provides students and practitioners with an overview of each system and how they interact with each other.

Parts I and II of this book introduce the content, principles, and guidelines while demystifying the terminologies through use cases and explanations of tools for access and use — from code sets and classification systems commonly used for administrative reporting to more complex clinical terminologies for semantic interoperability. Part III highlights the use of data standards and explores how terminology and classifications are applied in real-world settings.

Key Features

- Updated content includes ICD-11, SNOMED CT, LOINC, data sets, terminologies, the use and adoption of AI, and interchange standards, such as FHIR and data mapping.
- Code set adoptions and real-world use cases provide an understanding of how the terminology is used in the field.
- The relationships between terminologies and how they work together are explored.

About the Editor

Kathy Giannangelo, MA, RHIA, CCS, FAHIMA, has a comprehensive background in the field of clinical terminologies, classification, and data standards with more than 40 years of experience in HIM.

Instructor Resources include the following:

- Complete answer key for case studies and exercises in the book

About the Book

Coding professionals and educators will discover a unique and valuable resource to assist them with understanding the complexities of coding for inpatient reimbursement. Those training for positions in the coding field will find a useful guide to enhance their inpatient coding knowledge base as they prepare for certification. This book includes information from the 2016 Inpatient Prospective Payment System Final Rule.

Key Features

- Reimbursement and methodologies specific to inpatient practice settings, such as the inpatient prospective payment system (IPPS), the long-term care hospital prospective payment system (LTCH-PPS), the inpatient rehabilitation facilities prospective payment system (IRF-PPS), and inpatient psychiatric facility prospective payment system (IPF-PPS)
- Structure and organization of Medicare inpatient acute-care prospective payment system
- Relationship between coding and MS-DRG assignment
- Data quality and coding compliance processes related to coding and reimbursement for inpatient services
- Updated to include ICD-10-CM and ICD-10-PCS code sets in exercise and case answer keys and content on how these systems will impact inpatient reimbursement
- Case studies and exercises

The test bank is also available in Respondus.

About the Book

The eighth edition of *Principles of Healthcare Reimbursement and Revenue Cycle Management* is a comprehensive tool for educators, students, and healthcare professionals to master understanding of the US healthcare reimbursement systems and their impact on the US healthcare delivery system and economy.

This authoritative text offers detailed discussions of healthcare reimbursement methodologies and systems, the impact of health insurance, coding and billing compliance, value-based purchasing initiatives, and the revenue cycle and its management. It supports knowledge application and data analytics skill-building through real-life scenarios and case studies.

Key Features

- New online chapter 15 dedicated to payment systems for specialty settings
- Patient Connection section in each chapter guides the reader through applying chapter concepts to real-life scenarios
- New online appendix covering basic statistics
- Student workbook included in online ancillaries

About the Authors

Anne B. Casto, RHIA, CCS, is president of Casto Consulting, LLC, and a lecturer in the HIMS division at The Ohio State University School of Allied Medical Professions.

Susan White, PhD, RHIA, CHDA, is the chief analytics officer at The Ohio State University Wexner Medical Center.

Instructor Resources include the following:

- Test bank and full answer key
- Answer key for critical thinking questions
- Presentation slides
- Sample syllabus for baccalaureate programs

The test bank is also available in Respondus.

About the Book

Revenue Cycle Management Best Practices, Second Edition, helps health information professionals and students better understand and participate in the revenue cycle management (RCM) process by providing examples of how facilities can move from managing the revenue cycle by department to managing with an interdisciplinary approach to gain significant improvements on the timely flow of revenue. This book educates the reader in understanding the interdepartmental dependencies and overall contributors to RCM with a focus on acute-care hospitals from the perspective of the HIM department.

Key Features

- Chapter content illustrates best practices in RCM with a focus on acute-care hospitals from an HIM department perspective
- Online resources include sample forms, logs, questionnaires, policies, and tracking tools as well as supplementary AHIMA toolkits, white papers, and practice briefs

About the Authors

Nadinia A. Davis, MBA, RHIA, CHDA, CCS, FAHIMA, is the program coordinator of the HIM program at Delaware Technical Community College.

Belinda M. Doyle, MSJ, is the director of payer services for Children's Specialized Hospital's 14 locations throughout New Jersey

eBook Available
e-ISBN: **978-1-58426-719-5**

Medical Coding for Non-Coders, Second Edition, delivers a valuable introduction to medical coding for those in healthcare who need to understand the process of coding, but do not need the level of specificity required to become a coding professional.

In today's ever-growing, complex healthcare system, it is imperative that all healthcare professionals have a basic understanding of the coding process. This book explains how the documentation they supply impacts the coding process, healthcare data, and reimbursement as a whole.

Key Features

- Presents a coding overview in an easy-to-understand format, detailing the impact of coding on reimbursement, compliance, and fraud and abuse
- Provides a short overview of the coding systems
- Provides an overview of the process of coding including what causes delays from patient admission to final billing of the visit
- Addresses basic, yet critical questions such as:
 - What does a coder require to provide accurate coded data?
 - How is a medical record converted to coded data?
 - How are codes assigned?
 - How is coded data used?

About the Editor

Karen S. Scott, MEd, RHIA, CCS-P, CPC, FAHIMA, is the sole proprietor of her own consulting firm.

Unlocking the *Power* of Health Information

Helping Students Shape the Future of Healthcare

In today's world, health information is at the heart of healthcare, and as HI professionals, it's our job to protect, manage, and use it to make a real difference.

At AHIMA®, our resources are designed to align with CAHIIM curriculum standards, ensuring that students are ready not just for their first job, but for a fulfilling career in healthcare.

Health Information Management

Table of Contents

Part I: Data Content, Standards, and Governance

- 1 The US Healthcare Delivery System
- 2 Governing Data and Information Assets
- 3 Health Record Content and Documentation
- 4 Clinical Classifications and Terminologies
- 5 Data Management

Part II: Revenue Management and Organizational Compliance

- 6 Reimbursement Methodologies
- 7 Revenue Cycle Management
- 8 Clinical Documentation Integrity and Coding Compliance
- 9 Legal Issues in Health Information Management
- 10 Data Privacy, Confidentiality, and Security
- 11 Quality Management

Part III: Informatics, Analytics, and Data Use

- 12 Health Information Technologies
- 13 Health Information Systems Planning
- 14 Consumer Health Informatics
- 15 Healthcare Statistics
- 16 Healthcare Data Analytics
- 17 Data Visualization
- 18 Research Methods
- 19 Biomedical and Research Support

Part IV: Organizational Management and Leadership

- 20 Leadership and Management Theories and Strategies
 - 21 Strategic Thinking and Management
 - 22 Human Resources Management
 - 23 Employee Training and Development
 - 24 Work Design and Measurement
 - 25 Financial Management
 - 26 Project Management
 - 27 Ethical Issues in Health Information Management
- Appendix A: Answers to Odd-Numbered Check Your Understanding Exercises

Available as a Bundle

BUNDLE THIS BOOK WITH AHIMA STUDENT MEMBERSHIP.

Ask your Sales Representative for more information.

Instructor Resources include the following:

- Instructor manual with additional guidance, activities, and assignments
- Full answer key
- Test bank tagged with taxonomy levels and RHIA domains
- Presentation slides
- Transition guide

The test bank is also available in Respondus.

About the Book

Health Information Management: Concepts, Principles, and Practice, Seventh Edition, helps students and professionals already working with health information understand the value of quality information throughout the process of collecting patient data, aggregating the data to generate information, and using that information to increase knowledge and support decision-making. This book sets the path for excellence in four-year health information management (HIM) baccalaureate programs and identifies the critical competencies in the HIM field.

Key Features

- Aligned to AHIMA competencies stemming from the AHIMA Job Task Analysis
- Taxonomy level and RHIA domain identified for each review and test question
- Serves as the foundational text for RHIA certification study
- Student workbook and additional appendices available online
- Odd-numbered Check Your Understanding answer key allows students to self-assess their knowledge and build a framework for HIM principles

About the Editors

Pamela K. Oachs, MA, RHIA, CHDA, FAHIMA, is an assistant professor and director of the health information management undergraduate program in the College of St. Scholastica's healthcare informatics and information management department. She is currently on the editorial review board for *Perspectives in Health Information Management*.

Lisa M. Delhomme, MHA, RHIA, is the program director of the health information management program at the University of Louisiana at Lafayette. She teaches courses in privacy and security, data analytics, and database management. Mrs. Delhomme is an active AHIMA volunteer and served on AHIMA's Council for Excellence in Education. She has served in several volunteer roles with AHIMA and is a former president of the Louisiana Health Information Management Association. She is a frequent presenter at state and national conferences in her areas of expertise.

Health Information Management

Table of Contents

Part I: Foundational Concepts

- 1 Health Information Management Profession
- 2 Healthcare Delivery Systems
- 3 Health Information Functions, Purpose, and Users

Part II: Data Content, Structures and Standards

- 4 Health Record Content and Documentation
- 5 Clinical Terminologies, Classifications, and Code Sets
- 6 Data Management
- 7 Secondary Data Sources

Part III: Health Information and the Law: Legal Concepts, Protection, and Access

- 8 Health Law
- 9 Information Privacy and Confidentiality
- 10 Data Security

Part IV: Informatics, Analytics, and Data Use

- 11 Health Information Systems
- 12 Healthcare Information
- 13 Research and Data Analysis
- 14 Healthcare Statistics

Part V: Revenue Cycle Management and Compliance

- 15 Revenue Management and Reimbursement
- 16 Fraud and Abuse Compliance

Part VI: Leadership

- 17 Management
- 18 Performance Improvement
- 19 Leadership
- 20 Human Resources Management and Professional Development
- 21 Ethical Issues in Health Information Management

About the Book

Health Information Management Technology: An Applied Approach, Seventh Edition, transforms and enhances the education and training for health information management (HIM) professionals. The content in this book supports the American Health Information Management Association's (AHIMA) current curricula, and the chapters are mapped to AHIMA's Registered Health Information Technician (RHIT) domains. The organization of the information promotes students with a logical flow for skill development and knowledge building.

Key Features

- Aligned to AHIMA competencies stemming from the AHIMA Job Task Analysis
- Topical coverage expanded in the content areas of auditing, artificial intelligence, compliance, and critical thinking
- Updated real-world cases at the end of each chapter present actual scenarios faced by HIM professionals and are designed to initiate discussions that will elaborate on chapter topics
- Updated Check Your Understanding questions throughout each chapter reinforce concepts to improve comprehension
- Appendix A contains answers and rationales for odd-numbered Check Your Understanding questions
- Downloadable student resources include a student workbook with real-world cases and case discussion questions, application exercises, and review quizzes

About the Editors

Nanette B. Sayles, EdD, RHIA, CCS, CDIP, CHDA, CHPS, CPHI, CPHIMS, FAHIMA, is a professor in the health information management program at East Central College in Union, Missouri.

Leslie L. Gordon, MS, RHIA, CPHQ, FAHIMA, is retired from healthcare administration and education. She was the director of performance improvement for the Southeast Alaska Regional Health Consortium.

Health Information Management

Table of Contents

- 1 Domain I: Data Governance, Content, and Structure
- 2 Domain II: Information Protection: Access, Use, Disclosure, Privacy and Security
- 3 Domain III: Informatics, Analytics, and Data Use
- 4 Domain IV: Revenue Cycle Management
- 5 Domain V: Health Law and Compliance
- 6 Domain VI: Organizational Management and Leadership
- 7 Extended Cases

Health Information Management Case Studies, Third Edition

ebook Available
e-ISBN: **978-1-58426-914-4**

Instructor Resources include the following:

- Instructor manual
- Full answer key
- Discussion board questions
- Map to the AHIMA HIM curricula competencies

About the Book

Health Information Management Case Studies, Third Edition, is a collection of case studies, discussion questions, and assignments designed to give students practice applying their health information management (HIM) knowledge. This text includes a chapter for each of the six domains in the 2018 American Health Information Management Association (AHIMA) HIM curricula competencies and a seventh chapter with expanded case studies that span multiple domains.

With cases that meet or exceed the Bloom's taxonomy level assigned for each competency, this book is appropriate for students of all levels. Each case is labeled with the degree and Bloom's taxonomy levels it meets to help instructors easily identify the appropriate exercises for their courses. It is an ideal complement for AHIMA's *Health Information Management* and *Health Information Management Technology* textbooks and is perfect for use throughout a degree program.

Key Features

- More than 240 cases with accompanying exercises
- Four-color design labels each case with appropriate degree levels and Bloom's taxonomy level met
- Mapped to associate-, baccalaureate-, and graduate-level 2018 AHIMA HIM curricula competencies

About the Author

Dianna M. Foley, RHIA, CCS, CDIP, CHPS, has been an HIM professional for 25 years, holding jobs as coder, department supervisor, department director, and now as a coding consultant.

About the Authors

Nanette B. Sayles, EdD, RHIA, CCS, CDIP, CHDA, CHPS, CPHI, CPHIMS, FAHIMA, is a professor in the Health Information Management program at East Central College in Union, Missouri. She holds a doctorate in adult education from the University of Georgia. She also holds a master's degree in health information management, a master's degree in public administration, and a bachelor's degree in medical record administration from the University of Alabama at Birmingham.

Amanda C. Barefield, EdD, RHIA, LNHA is a professor in the Health Information Administration program at Augusta University. She holds an EdD in instructional technology and distance education from Nova Southeastern University, a master's degree in health services administration from Central Michigan University, and a bachelor's degree in health information administration from the Medical College of Georgia. She is a registered health information administrator as well as a licensed nursing home administrator.

The test bank is also available in Respondus.

About the Book

Health information management (HIM) students and professionals must learn everything they can about the basics of electronic health records (EHRs), general healthcare computer systems, data retrieval, and other EHR system topics. *Introduction to Information Systems for Health Information Technology* helps readers understand how these systems and issues affect, and are affected by, the HIM profession. Updated to reflect current information technology content in the healthcare environment, this fifth edition explains the growing wealth of health data and information available to HIM practitioners and what it can do for patients and society, while also explaining the responsibility to secure these assets. This edition emphasizes professional applications of HIM knowledge, offering revised real-world scenarios and practice opportunities.

Key Features

- Online student resources
- Real-World Cases and Check Your Understanding questions in each chapter
- Updated privacy and security information and best practices

Instructor Resources include the following:

- Instructor manual
- Test bank
- Presentation slides
- Transition guide

The test bank is also available in Respondus.

About the Book

Management for the Health Information Professional, Third Edition, provides instruction in management and leadership principles from a health information management (HIM) viewpoint. This approach provides a foundation and path for sound management practice and decision-making for HIM students and professionals in today's healthcare environment.

Key Features

- Expanded coverage of topics such as management for in-person and remote meetings, budget variances and how to manage them, and trends in recruitment, selection, and retention
- Each chapter includes learning objectives, key terms, Check Your Understanding questions to test comprehension of chapter material, and a case study
- Case studies focus on the application of management principles for HIM professionals through comprehensive scenarios, discussion questions, and activities linked to competencies
- An appendix provides three practical case studies requiring critical thinking, application of knowledge, and, in some cases, additional research to support answers

About the Authors

Janette R. Kelly, MBA, RHIA, is an associate professor and interim program director of the health information management program at the University of Cincinnati.

Pamela S. Greenstone-Childers, EdD, RHIA, is a professor and department head of Clinical and Health Information Sciences, as well as interim associate dean, Academic Affairs, College of Allied Health Sciences at the University of Cincinnati.

- Lesson plans
- Presentation slides
- Baccalaureate and associate degree program syllabi
- Map to the AHIMA HIM curricula competencies
- Full solutions manual for all exercises and tests
- Transition guide

The test bank is also available in Respondus.

About the Book

Calculating and Reporting Healthcare Statistics, Seventh Edition, introduces and illustrates the basics of statistical computation so that health information practitioners, who have ever-increasing contact with and uses for healthcare data, can learn about healthcare statistics and how they are generated. This edition presents hands-on Excel calculations

This text is intended for use in two- and four-year health information technology (HIT) or health information administration (HIA) programs and also serves as an excellent reference for healthcare professionals seeking to sharpen their statistical skills.

Key Features

- New Exercises with higher-level data analysis
- Step-by-step hands-on calculations using Microsoft Excel, one of the most powerful statistical tools available
- Data tables available for select exercises
- Explores data presentation, inferential statistics, basic research principles, data mining, and data analytics
- Includes traditional hospital statistics, such as average length of stay and total inpatient service days
- Explains statistical computations and techniques commonly used in healthcare settings
- Answers and rationales to odd-numbered questions
- Glossary of commonly used terms in healthcare statistics

About the Author

Susan White, PhD, RHIA, CHDA, is the chief analytics officer at The Ohio State University Wexner Medical Center. White is also an adjunct associate professor in the health information management and systems division at The Ohio State University, where she teaches data analytics, healthcare finance, and database courses.

- Transition guide

The test bank is also available in Respondus.

About the Book

Quality and Performance Improvement in Healthcare: Theory, Practice, and Management covers trends in healthcare quality control and performance. It presents a comprehensive introduction to the theory, practice, and management of performance and quality improvement processes in healthcare organizations.

Parts I and II provide a basic background in performance improvement (PI) philosophy and methodology for healthcare practice today. Part III focuses on the issues inherent in the management of quality and PI programs in healthcare. Each chapter reinforces understanding of PI concepts and issues with case studies and real-life examples.

Key Features

- NEW online student quizzes for additional practice
- Check Your Understanding questions in each chapter support self-assessment
- Four-color design enhances presentation of key topics
- Chapter content is mapped to the current 2018 AHIMA HIM curricula competencies
- Student projects range from designing specific improvement projects to ongoing quality monitoring and managing quality improvement programs and staff

About the Authors

Patricia L. Shaw, EdD, RHIA, FAHIMA, is professor emerita and adjunct professor at Weber State University, where she teaches quality and performance improvement and coding courses.

Darcy Carter, DHSc, MHA, RHIA, is department chair, associate professor, and MHA program director at Weber State University, where she teaches courses in coding, reimbursement, quality management, and healthcare management.

About the Book

Healthcare Quality and Performance Improvement Case Studies is a collection of real-world scenarios that provide students with the opportunity to apply the tools and techniques necessary to effectively support quality and performance improvement in healthcare.

Each case study includes a description, instructions, and helpful tips. With case studies that portray situations faced by quality professionals, frontline managers, and staff in a variety of healthcare settings, this book is an ideal complement for *Quality and Performance Improvement in Healthcare: Theory, Practice, and Management*.

Key Features

- More than 50 case studies to practice real-world scenarios from a variety of healthcare settings
- Appendix A includes bonus case studies for additional practice
- Student worksheets available for ease of practice

About the Technical Editors

Megan McDougal, MS, RHIA, CHPS, CHTS, is an associate professor and assistant director of the health informatics and information management program at West Virginia University. She has extensive experience as both a HIM educator and professional, specializing in healthcare data integrity, regulatory compliance, quality improvement, and leadership.

Andretta Reed, MHA, RHIA, is a health information management professional with a wide range of experience within the healthcare industry. Throughout her career Ms. Reed has applied healthcare quality initiatives as it relates to medical record processing, revenue cycle, and clinical documentation improvement.

About the Book

Leadership Development for Healthcare: A Pathway, Process, and Workbook advances the healthcare student or professional's abilities in meeting current organizational challenges through both leader and leadership development. This book provides a framework to help guide the acquisition of characteristics and behaviors associated with effective leadership, incorporating both moral and technical competence.

Key Features

- Opportunities for being a leader and practicing leadership are available to everyone and leadership behavior and practice can be cultivated by anyone
- Chapters are designed to reinforce the learn–discover–practice process to support leader and leadership development
- Exercises and activities are offered throughout the book to change or create and practice leader and leadership behaviors
- Appendix provides an overview of the evolution of thought on leadership and describes many of the common leadership theories developed between the early 20th century and today

About the Author

Merida L. Johns, PhD, RHIA, has more than 40 years of health information management experience on national and international levels and is a noted author and presenter in the field. She currently heads The Monarch Center for Women's Leadership Development and is professor and director of health informatics and information management at Resurrection University in Chicago

About the Book

The Sixth edition of AHIMA's *Pocket Glossary of Health Information* includes essential terms from foundational and emerging health information management (HIM) and health information technology (HIT) topics. Unique and critical terms from the fields of information governance, data analytics, and health informatics are also defined and described, making this an essential reference tool for health information (HI) practitioners, educators, students, researchers, and any healthcare professional with an interest in HI practice.

Key Features

- More than 3,800 terms at your fingertips
- More than 165 revised terms
- Excellent accompaniment to AHIMA foundational HIM and HIT textbooks
- Includes citations and a complete reference list

About the Technical Editors

April Insko, PhD, RHIA, CCS, CHDA, CPC-I, CPHI, is a professor and program director of the AAS HIM program, the AAS medical informatics program, and the medical coding certificate program at Roane State Community College.

Melissa Koehler, DHA, MBA, RHIA, CCDS, CCS, CCS-P, CDIP, CHDA, CRCR, CSBI, CSPP, FAHIMA, is the senior director of coding operations for Inova Health System.

- Full answer key for student workbook

The test bank is also available in Respondus.

About the Book

The third edition of *Introduction to Health Information Privacy and Security* provides an overview of health information privacy and security, outlining the requirements of the HIPAA Privacy and Security Rules, as well as other laws and organizations that regulate health information. It defines the basic terms and concepts related to HIPAA privacy and security, and it introduces the reader to practical themes such as threat identification, data security mechanisms, and business continuity that are critical to the management of health information.

Key Features

- Provides a general overview of health information privacy and security terms and concepts
- Presents information to reach readers who have little or no previous knowledge of these topics
- Includes real-world privacy and security case studies in each chapter and a student workbook to enhance learning
- Integrates updated and expanded coverage of data protection, information blocking, and cybersecurity threats

About the Author

Laurie A. Rinehart-Thompson, JD, RHIA, CHP, FAHIMA, is the director of the Health Information Management and Systems program and is an associate professor of clinical health and rehabilitation sciences at The Ohio State University.

Fundamentals of Law for Health Informatics and Information Management, Fourth Edition

Melanie S. Brodnik, PhD, MS, RHIA, FAHIMA

Laurie A. Rinehart-Thompson, JD, RHIA, CHP, FAHIMA

Rebecca B. Reynolds, EdD, MHA, RHIA, FAHIMA

Product#: **AB241822** ©2023

ISBN: **978-1-58426-880-2**

Softcover 476 pages

Premier Member: **\$74.95**

Member: **\$79.95**

List: **\$99.95**

eBook Available
e-ISBN: **978-1-58426-881-9**

Instructor Resources include the following:

- Instructor manual
- Full answer keys
- Test banks
- Map to the AHIMA HIM curriculum competencies
- Presentation slides
- Transition guide

The test bank is also available in Respondus.

About the Book

Health law is a complex and rapidly changing topic, and students studying health information management (HIM) or health informatics require the most current information to be prepared to achieve legal compliance in a professional setting. This fourth edition of *Fundamentals of Law for Health Informatics and Information Management* also includes up-to-date information on HIPAA privacy and security, patient safety, legal proceedings, and more.

Key Features

- Chapters on law and ethics as well as patient rights
- Reorganized and consolidated chapters to enhance students' understanding of law and healthcare
- Enhanced content on legal proceedings, cyber security, and patient safety
- Updated healthcare law concepts and terminology
- Robust student ancillaries include activities mapped to the applicable taxonomy

About the Editors

Melanie S. Brodnik, PhD, MS, RHIA, FAHIMA, is an associate professor emeritus of the undergraduate program in health information management and systems and the graduate program in health informatics at The Ohio State University.

Laurie A. Rinehart-Thompson, JD, RHIA, CHP, FAHIMA, is the director of the health information management and systems program and is an associate professor of clinical health and rehabilitation sciences at The Ohio State University.

Rebecca B. Reynolds, EdD, MHA, RHIA, FAHIMA, is an associate professor and program director of the graduate program in HIIM at the University of Tennessee Health Science Center in Memphis.

HIPAA by Example: Application of Privacy Laws, Second Edition

Mary C. Thomason, MSA, RHIA, CHPS, CISSP

Product#: **AB121113** ©2013

ISBN: **978-1-58426-078-3**

Softcover 240 pages

Premier Member: **\$57.95**

Member: **\$59.95**

List: **\$74.95**

eBook Available
e-ISBN: **978-1-58426-095-0**

Instructor Resources include the following:

- Test bank
- Presentation slides

The test bank is also available in Respondus.

About the Book

HIPAA by Example: Application of Privacy Laws, Second Edition, provides examples of expert reasoning on how the Health Insurance Portability and Accountability Act (HIPAA) Privacy and Security Rules can be applied correctly under various real-life scenarios. Text scenarios describe 140 actual situations that health information managers or privacy officers may encounter. Answers include best practices and reference current state, federal, and international laws.

Key Features

- Additional scenarios reflect the current changes to the HIPAA regulations as required by the Breach Notification Rule, various changes as required by Health HITECH Act, and the Genetic Information Non-Discrimination Act (GINA)
- Table of contents organized into natural categories such as HIPAA and the Court System and Compliance, to help the reader find pertinent scenarios
- Clears up subtle, gray areas in the Privacy and Security Rules
- Applies regulations to real-life scenarios
- Provides reference material for further research
- Recommends solutions to a broad range of healthcare situations

About the Author

Mary C. Thomason, MSA, RHIA, CHPS, CISSP, is a leading and respected compliance expert and health privacy consultant.

Principles of Finance for Health Information and Informatics Professionals, Second Edition

Susan White, PhD, RHIA, CHDA

Product#: **AB204017** ©2018

ISBN: **978-1-58426-593-1**

Softcover 348 pages

Premier Member: **\$52.95**

Member: **\$55.95**

List: **\$69.95**

eBook Available
e-ISBN: **978-1-58426-660-0**

Instructor Resources include the following:

- Instructor manual
- Presentation slides
- Map to the AHIMA HIM curricula competencies

About the Book

Principles of Finance for Health Information and Informatics Professionals, Second Edition, arms health information management (HIM) students with the foundational knowledge needed to navigate the complexities of healthcare financial management. Using healthcare-based examples, this book guides students through analyzing financial statements, creating budgets, and managing revenue and expenses to bolster understanding of real-world business practices. It deconstructs financial performance metrics and familiarizes readers with identifying variance, financing, and capital investments to provide tools for sound financial decision-making.

Key Features

- Features content on revenue and expense management and budgets
- Covers the essentials for understanding and applying financial management concepts to an HIM professional's everyday roles and responsibilities
- Presents finance and accounting vocabulary as defined in a real-world context for the healthcare environment
- Includes case study data for hands-on practice

About the Author

Susan White, PhD, RHIA, CHDA, is the administrator of analytics at the James Cancer Hospital at The Ohio State University Wexner Medical Center and an associate professor in the health information management and systems division at The Ohio State University.

e-ISBN: **978-1-58426-780-5**

Instructor Resources include the following:

- Instructor manual
- Test bank
- Sample data sets
- Map to the AHIMA HIM curricula competencies

The test bank is also available in Respondus.

About the Book

A Practical Approach to Analyzing Healthcare Data, Fourth Edition, offers guidance to healthcare professionals and health information management (HIM) students on how to best analyze, categorize, and manage the data that they encounter in an industry becoming ever more dependent on these tasks. Updated information on data collection, analysis tools, and the CHDA credential and its domains, this text helps readers gain a comprehensive understanding of data and its effects on healthcare management.

Key Features

- Shift in focus to R data analysis software
- Updated data files to aid in student comprehension
- Revised references and analysis tools
- Updated Certified Health Data Analyst (CHDA) Examination Domains and Eligibility requirements
- Excel Data Analysis Toolpak Reference Guide with corresponding downloadable Excel data sheet
- Chapter review exercises and answer key containing odd-numbered solutions

About the Author

Susan White, PhD, RHIA, CHDA, is the administrator of analytics at the James Cancer Hospital at The Ohio State University Wexner Medical Center and an associate professor in the health information management and systems division at The Ohio State University.

Member: **\$71.95**

List: **\$89.95**

eBook Available
e-ISBN: **978-1-58426-786-7**

Instructor Resources include the following:

- Instructor manual
- Instructor access to presentation slides
- Lab exercises
- Test bank for each chapter

The test bank is also available in Respondus.

About the Book

Data analytics proficiency is now, more than ever, important for all health information managers and health informaticians. *Data Analytics in Healthcare Research: Tools and Strategies* demonstrates how to conduct health data analytics and secondary research studies with authentic case studies that provide experience with databases and statistical software for data extraction, normalization, transformation, visualization, and statistical analyses. By combining open-source data and open-source analytic tools, this textbook, along with online datasets, provides faculty and students a unique opportunity to experience big data from a truly hands-on perspective.

Key Features

- New four-color interior design with updated artwork!
- Provides research and analytic case studies, including step-by-step instructions for analyzing healthcare data and using statistical techniques
- Offers remote access to an SQL healthcare-related database for big data analysis with access to database queries and statistical platform scripts for use in the classroom
- Uses a database consisting of open-source data integrated from a variety of federal agencies including the Centers for Medicare and Medicaid Services (CMS), and the US Census Bureau, Office of the National Coordinator for Health Information Technology, Environmental Protection Agency (EPA), Centers for Disease Control and Prevention, and Minnesota Department of Health
- Utilizes MySQL Workbench, Microsoft Excel, R, and RStudio for statistical analysis and data visualization

- Presentation slides
- Sample program syllabi
- Map to the AHIMA HIM curriculum competencies
- Transition guide

The test bank is also available in Respondus.

About the Book

Introduction to Healthcare Informatics brings together healthcare-generated information with technology for the purpose of improving quality of care in a cost-effective manner. Written by industry experts, this new edition of *Introduction to Healthcare Informatics* provides a comprehensive overview to key concepts that are vital to healthcare informatics and how they affect the industry as a whole. Newly organized chapters contain fundamental information on electronic health records (EHRs), ethics, data and information, privacy and security, research, and future trends in the field of healthcare informatics.

Key Features

- New chapter organization to aid in student comprehension
- New case studies from real world examples in each chapter
- In-depth analysis of data types, standards, data quality, and the interpretation and display of information
- Healthcare legal issues are explored, such as HIPAA and legal EHRs

About the Editors

Leming Zhou, PhD, DSc, is an associate professor and the Master of Science in Health Informatics program director within the Department of Health Information Management at the University of Pittsburgh.

Lesley Clack, ScD, CPH, is an Associate Professor and Chair of the Department of Health Sciences at Florida Gulf Coast University. She also serves as the Program Director for the Master of Science in Health Science and Bachelor of Science in Health Administration degree programs.

- Presentation slides
- Test bank
- Full answer key
- Map to the AHIMA HIM curricula competencies

About the Book

Dedicated to the study and practice of health informatics and health information management (HIM), *Health Informatics Research Methods: Principles and Practice*, Second Edition, focuses on the practical applications of research in health informatics and HIM. It provides real-life examples of research studies, step-by-step research methods, and explanations of analytic procedures. The book's organization guides students and professionals through the process of conducting research specific to health informatics and HIM and is an in-depth resource for both novice and experienced researchers.

This second edition includes chapters dedicated to data science and data mining, systematic reviews and meta-analysis, and applied statistics, application exercises at the end of each chapter, and online student ancillaries that provide additional templates, examples, and resources to support chapter topics.

Key Features

- Aligns to the AHIMA HIM baccalaureate and graduate curricula competencies
- Builds research skills, application to data analysis, and decision making
- Ideal for health informatics and HIM students
- Provides detailed structure for planning, conducting, reporting, and assessing research
- Real-world examples illustrate research methodology

About the Editors

Valerie J. Watzlaf, PhD, MPH, RHIA, FAHIMA, is an associate professor within the Department of Health Information Management in the School of Health and Rehabilitation Sciences (SHRS) at the University of Pittsburgh.

Elizabeth J. Forrestal, PhD, RHIA, CCS, FAHIMA, is a professor emerita in the Department of Health Services and Information Management at East Carolina University, Greenville, NC.

Instructor Resources include the following:

- Instructor manual
- Test bank
- Presentation slides
- Transition guide

The test bank is also available in Respondus.

About the Book

Documentation for Health Records explains the importance of accurate and timely health record documentation and addresses fundamental documentation requirements and practices in a variety of healthcare settings.

This third edition takes a fresh perspective on a variety of health record documentation uses and settings while addressing key documentation topics such as privacy and security, enterprise data and information management, telehealth, and artificial intelligence.

Key Features

- New chapter dedicated to behavioral healthcare documentation
- Provides federal and state requirements and accreditation guidelines
- Incorporates documentation for acute care as the practice model
- Covers documentation in a variety of practice settings and telehealth
- Aligned to AHIMA competencies stemming from the AHIMA Job Task Analysis

About the Volume Editors

Dilhari DeAlmeida, PhD, RHIA, FAHIMA, is an associate professor and vice chair of education in the HIM department at the University of Pittsburgh. Dr. DeAlmeida is also the program director of the bachelor of science in health informatics program. Dr. DeAlmeida has worked in basic science research for more than 12 years and transitioned to academia in 2012.

Heather Merkley, DHSc, RHIA, is the HIM program director and an associate professor at Weber State University in Ogden, UT. She has worked in the HIM field for 30 years, primarily as an HIM educator. Dr. Merkley also has experience in long-term care and home health consulting, and acute care experience in utilization management, research, and outpatient coding.

About the Book

Discover the latest trends and applications in health IT with the seventh edition of *Health IT and EHRs: Principles and Practice*. Updated to include the most current information on healthcare technologies, this edition offers comprehensive guidance on developing and implementing health IT systems for students of health information management (HIM) and informatics. This book addresses the broader scope of IT being used in healthcare, such as mobile and telehealth, EHR implementation, cybersecurity, change management, and the emergence of artificial intelligence (AI), to aid improvement in quality of care. Whether you are a student or a healthcare professional looking to stay ahead in the rapidly evolving field of health IT, this book is an essential resource for understanding the principles and practices driving innovation in healthcare technology.

Key Features

- New chapter exploring AI and emerging technologies in healthcare
- Updated content on EHR implementation, interoperability, optimization, telehealth, systems development life cycle, strategic planning, workflow, and process improvement
- New and refreshed case studies utilizing real world examples
- Covers the use of EHRs beyond their use solely for documentation to much broader utility in decision support, evidence-based practice, care coordination, and patient engagement in care
- Chapters reorganized and condensed to aid in student comprehension

About the Book

Implementing Health Information Governance: Lessons from the Field outlines lessons from healthcare organizations that have already made progress in formalizing information governance. It offers tested practices for aligning governance to the organization's goals, organizing and staffing governance and enterprise management, building on what is working, and guiding incremental improvement.

Key Features

- A model for understanding the functions of information governance and enterprise information management
- 26 individual case studies are profiled in 14 distinct healthcare organizations
- Case study organizations span multiple healthcare delivery systems at various stages of implementing information governance policies
- Practical roadmaps for securing support for information governance and getting started
- Well-suited for a broad audience of healthcare professionals and graduate-level HIM students alike

About the Author

Linda L. Kloss, MA, RHIA, FAHIMA, is founder and president of Kloss Strategic Advisors, Ltd. providing thought leadership and advisory services to health information business leaders, provider organizations, and healthcare associations on health information asset management, health data analysis, governance, and change leadership. Previously, Ms. Kloss served as CEO of AHIMA from 1995–2010.

The test bank is also available in Respondus.

About the Book

Outpatient clinical documentation improvement (CDI) is a vital step in the evolution of a comprehensive, overarching CDI program. *Clinical Documentation Improvement for Outpatient Care: Design and Implementation* is an all-inclusive guide to establishing and enhancing CDI programs for the outpatient and professional fee setting. It explains how to ensure sustainability and is a one-stop shop for information about regulatory changes that affect the healthcare industry.

Key Features

- Can be used for standalone course work or as part of a class related to healthcare reimbursement
- Content doubles as a professional toolkit and strategy guide for developing a best-in-class outpatient CDI program
- Detailed case examples demonstrate real-world applications of essential outpatient CDI concepts
- Includes an online workbook for students and professionals

About the Author

Pamela Carroll Hess, MA, RHIA, CCS, CDIP, CPC, is a health information management (HIM) professional with over 30 years of healthcare experience in revenue cycle operations, electronic health record applications, healthcare informatics, data analytics, revenue integrity, HIM operations, compliance, quality control, clinical documentation programs, and provider education. Ms. Hess currently serves as vice president of strategy and operations with MedASTUTE Consulting, LLC, a consulting firm focused on leveraging analytics for performance improvement with healthcare providers and health plans. She has extensive experience as an HIM director in for-profit and nonprofit facilities.

About the Book

Clinical Documentation Improvement: Principles and Practice clearly defines clinical documentation improvement (CDI), explains its importance, and presents an objective and uniform set of principles that can be applied reliably in any healthcare organization's CDI program. Part I addresses the fundamentals of clinical documentation and provides guidance for making the decision to implement a new program or improve the current one. Part II describes clinical documentation program implementation—from staffing and training to ensuring program compliance. Finally, Part III recommends and explains a process for expanding and refining a clinical documentation program.

Key Features

- Explains how the transition to ICD-10 will have an impact on the CDI process, highlighting specific coding scenarios functions are explained in detail
- Includes a chapter on critical thinking for physicians, nurses, clinical documentation specialists, and coders

About the Author

Pamela Carroll Hess, MA, RHIA, CCS, CDIP, CPC, is a health information management (HIM) professional with over 30 years of healthcare experience in revenue cycle operations, electronic health record (EHR) applications, healthcare informatics, data analytics, revenue integrity, HIM operations, compliance, quality control, clinical documentation programs, and provider education. Ms. Hess currently serves as vice president of strategy and operations with MedASTUTE Consulting, LLC, a consulting firm focused on leveraging analytics for performance improvement with healthcare providers and health plans. She has extensive experience as an HIM director in for-profit and nonprofit facilities.

About the Book

Enterprise Health Information Management and Data Governance provides the fundamentals, principles, and practices for managing the data asset and tackles how healthcare organizations can manage their data in this era of dramatic data explosion and growing deployment of information technologies. This text provides a framework and logical structure to help students understand the components of health information management in a digital era and to provide them with opportunities to develop the necessary skills for performing functions associated with these components.

Key Features

- Provides an outline of enterprise-wide information management (EIM) for healthcare
- Each chapter incorporates a case study, providing a real-world perspective to student learning and exploring the concepts and interrelationships of EIM and data governance
- Students are invited to be a part of the case study through a set of activities at the end of each chapter
- Advanced concepts are provided at the end of each chapter for in-depth analysis and study
- Aligns with AHIMA core competencies
- Online student workbook with additional resources

About the Author

Merida L. Johns, PhD, RHIA, has over 40 years of health information management experience on national and international levels and is a noted author and presenter in the field. She currently heads The Monarch Center for Women's Leadership Development.

BUNDLE THIS BOOK WITH THE CHDA EXAM.

Ask your Sales Representative for more information, or see the [AHIMA Store](https://ahima.org/store).

About the Book

Sharpen your data analysis and test-taking skills in preparation for the CHDA exam. The exam experience is simulated in the book and accompanying online assessment by three full-length 150-question exams, each containing questions that cover all five CHDA domains. In addition, an appendix of commonly found acronyms allows you to review your healthcare-data-specific terminology before sitting for the exam. Paired with *A Practical Approach to Analyzing Healthcare Data* or used alone, this book provides the most comprehensive CHDA preparation currently on the market.

Key Features

- 450 CHDA questions are included in the book and online assessment
- Answers include rationales and references to enhance learning
- All questions from the text are available as timed, self-scoring web-based practice exams and practice questions

For more information on the CHDA exam, visit <https://ahima.org/certification>.

About the Editor

Susan White, PhD, RHIA, CHDA, is the chief analytics officer at The Ohio State University Wexner Medical Center. White is also an adjunct associate professor in the health information management and systems division at The Ohio State University, where she teaches data analytics, healthcare finance, and database courses.
