

Certified Documentation Integrity Practitioner (CDIP) Content Outline Crosswalk 2011-2023

Executive Summary

In 2022, the American Health Information Management Association (AHIMA) began a job task analysis for the Certified Documentation Integrity Practitioner (CDIP) professional certification. The purpose of the current job analysis study was to validate the current tasks that are in the content outline for the CDIP program as well as identify additional tasks that may be required of CDIPs in their current role. The result of the CDIP job task analysis study resulted in an updated Content Outline (CO) to ensure the most current state of practice is being tested in the examination.

The steps for conducting a job analysis study include the following methodology:

1. Subject Matter Expert (SME) interview questionnaire
2. Exam Development Committee (EDC) reviews the interview to add new task statements for inclusion in the Job Analysis Survey
3. Updated Content Outline is incorporated into the Job Analysis Survey and administered to individuals practicing within the population to collect ratings on the tasks on importance and frequency of use
4. During a test specifications meeting, the EDC and SMEs review survey ratings and other data from the population to develop an updated Content Outline and Test Design
5. The outcomes from the test specifications meeting are presented to the Commission on Certification for Health Informatics and Information Management (CCHIIM) for review and approval.

Summary of 2023 CDIP Content Outline Updates

The results from the 2022 Certified Documentation Integrity Practitioner (CDIP) job analysis study indicated that 5 of the 6 domains remain relevant for a CDIP practicing professional and that many of the tasks expected by a CDIP remain appropriate. It was determined the “Research” topic in Domain 5 (Research and Education) no longer remained reflective of the CDIP practicing professional. Therefore, the research components were removed, and the remaining “Education” components were moved into Domain 2. Domain 5 was removed and Domain 2’s name changed to “Education and Leadership Development” (as shown in Table 1 below).

A total of 5 new tasks were added and 8 tasks were removed. Several of the tasks were combined and moved to different domains and much of the subtext was revised throughout for clarification or updated to reflect the tasks of current CDIP practicing professionals.

In addition, the time allotted to complete the exam, and eligibility requirements/recommendations were reviewed/discussed, and it was determined the exam specifications remain appropriate and should remain the same.

The number of items allocated to each domain were discussed and adjusted based off the expertise of the exam specifications panel of SMEs. **Table 1** below portrays the changes in number of items allocated to each domain of the Content Outline. **Table 2** (page 2-page 8) presents the 2011 Content Outline and maps the changes to the 2023 Content Outline.

Table 1. CDIP Content Outline (CO) Domain Item Allocation

	Content Outline (CO) Domain (2011)	2011 CO	Content Outline (CO) Domain (2023)	2023 CO
1	Clinical Coding Practice	23-28 items	Clinical Coding Practice	16-19 items
2	Leadership	18-23 items	Education and Leadership Development	22-28 items
3	Record Review & Document Clarification	25-30 items	Record Review & Document Clarification	29-35 items
4	CDI Metrics & Statistics	15-19 items	CDI Metrics & Statistics	8-12 items
5	Research & Education	12-16 items	Compliance	19-24 items
6	Compliance	4-8 items	N/A	N/A

Note: Candidates will begin being assessed on the 2023 CDIP Content Online on **June 01, 2023**.

Content Outline Crosswalk 2011-2023**

TABLE 2. 2011 CDIP Content Outline mapped to the 2023 CDIP Content Outline

Domain 1 Clinical Coding Practice 2011 Content Outline		Domain 1 Clinical Coding Practice 2023 Content Outline		Change
Task Number	Task Statement	Task Number	Task Statement	
1	Use reference resources for code assignment	1	No Change	n/a
2	Identify the principal and secondary diagnoses in order to accurately reflect the patient’s hospital course	2	No Change	n/a
3	Use coding software	Removed		
4	Assign and sequence ICD-10-CM/PCS codes	3	Assign and sequence diagnosis and procedure codes	Changed “ICD-10-CM/PCS” to “diagnosis and procedure”
5	Use coding conventions	4	Apply coding conventions and guidelines related to diagnosis and procedure codes	Changed “Use” to “Apply” Added “and guidelines related to diagnosis and procedure codes”
6	Display knowledge of Payer requirements for appropriate code assignment (e.g. CMS, APR-DRGs, APGs)	Removed	n/a	
7	Assign appropriate DRG codes	5	Understand the assignment of the working and final DRG	Reworded entire task statement
8	Communicate with the coding/HIM staff to resolve discrepancies between the working and final DRGs	6	Communicate with the coding/HIM staff to resolve discrepancies between the working and final DRGs and to ensure coding and reimbursement updates are incorporated into practice	Added “and to ensure coding and reimbursement updates are incorporated into practice”
9	Participate in educational sessions with staff to discuss infrequently encountered	Removed	n/a	
10	Assign CPT and/or HCPCS codes	Removed	n/a	Removed as included in Domain 1, Task 3 (2023)
11	Communicate with coding/HIM staff to resolve discrepancies in documentation for CPT assignment	Removed	n/a	Removed as included in Domain 1 task 6 (2023)
